RetroKit

# The One-Stop-Shop Platform

**RetroKit's platform is your digital toolkit to**:

- Access your clients' BER data efortlessly through RetroKit's *trusted partner* interface to SEAI's databases
- Keep your data secure and flowing efficiently every step of the way
- Accurately model a wide range of energy upgrade options, at scale, and optimise your renovation proposals
- Create professional Home Energy Assessment Reports and clear Upgrade Plans with a few clicks
- Integrate with your CRM and project management systems using RetroKit's APIs
- Facilitate compliance with SEAI's Grant Application & Quality Management requirements

RetroKit has been developed for Irish and European One-Stop-Shops, by a team of leading energy engineers and software developers. Climate action, eliminating fuel poverty and making every home comfortable is at the core of everything we do.
